SUMMARY

An enthusiastic fresher in Automation Engineering with knowledge of PLC, sensors, and industrial automation. Eager to work on industrial projects and improve troubleshooting skills. Quick learner and easily adaptable

TECHNICAL SKILLS

PLC programming	TIA portal	HMI Design (DIA screen)
Electrical wiring	RS logic	ISPsoft

PROFESSIONAL EXPERIENCE

Voltvision Controls pvt.ltd May 2026 - Jun 2026

- Hands-on experience in industrial control panel assembly, power/control wiring, and electrical schematic interpretation.
- Worked on Star-Delta, VFD, PLC, HMI, and Jog control panels, including component mounting and panel wiring & testing.

Mettur Thermal Power Station-II. (21 days of implant training) Jun 2025

- Explored the operation of a coal-based thermal power plant & generator systems.
- Learned fundamentals of electrical systems, protection equipment, and control & automation used in power generation.

Titan company limited (Pre-apprentice) May 2024 - Aug 2024

- Experienced practical exposure to industrial electrical systems and basic automation practices used in manufacturing operations at Titan.
- Assisted during maintenance, understanding safety procedures, and learning real-time industrial workflows, improving my practical engineering knowledge.

PROJECTS

Multi stage Elevator Trainer Kit for PLC Mar 2026

- Designed and fabricated a complete elevator trainer kit, including mechanical structure, panel wiring, and I/O interfacing with fail-safe protection system using relays.
- Built a universal hardware setup with externally tapped I/O, compatible with any PLC platform. Programmed and tested the system using TIA Portal V20 with Siemens S7-1200

Diesel Generator Auto Start & Load Sharing System Jan 2026

- Designed and implemented a Diesel Generator Auto Start & Load Sharing System using PLC and HMI, enabling automatic start/stop based on EB supply with real-time monitoring, alarm handling, Fault indication and Auto cut-off system for safety measures.

4-Way Traffic Signal Control using Delta PLC & HMI Dec 2025

- Designed a 4-way traffic signal using Delta ISPSoft (PLC programming) and DOPSoft (HMI visualization & control) with safe interlocking logic.
- Implemented timer-based sequencing and Auto/Manual mode selection through HMI for flexible traffic signal operation and testing.

EDUCATION

Bachelor of Electronics and Instrumentation Engineering Aug 2024- Apr 2027 (present)
Government College Of Technology, Coimbatore

Diploma in Electrical and Electronics Engineering Jun 2021- Apr 2024
Government Polytechnic College, Bargur

ADDITIONAL INFORMATION

- **Languages:** English, Tamil
- **Certifications:** Industrial Automation Workshop
- **Activities:** Placement Representative, Director of Events at GCT IEEE SB - 81571.
